PROFESSIONAL SUMMARY

Entry-level Data Analyst with hands-on experience in data collection, cleaning, validation, and exploratory data analysis (EDA). Proficient in Python, SQL, Pandas, and NumPy with a track record of building end-to-end ML pipelines and delivering data-driven insights. Familiar with Power BI and Advanced Excel for dashboards and visual reporting. Pursuing Executive MCA from IIT Patna & IIIT Ranchi, with Oracle-certified expertise in Data Science and AI — eager to contribute analytical thinking and technical skills.

EXPERIENCE

Data Science Intern | Shamgar Software Solutions (Remote) | Training program
Oct 2025 – Mar 2026

- Completed training in Python, SQL, Data Analysis, and Machine Learning concepts.
- Practiced data cleaning, EDA, and data preprocessing using Python, Pandas, and NumPy.
- Built basic dashboards and reports using Power BI and Excel through guided assignments.

PROJECTS

Ola Ride Data Analytics Dashboard

SQL | Power BI | Excel | Power Query | DAX

- Cleaned and analyzed ride booking data using SQL to extract business insights.
- Built an interactive Power BI dashboard with KPI cards, charts, slicers, and DAX measures.
- Performed booking, cancellation, customer rating, revenue, and vehicle performance analysis.
- Created SQL views and aggregate queries for efficient reporting.
- Improved data visualization using Power Query transformations and dashboard design best practices.
- **GitHub:** github.com/ansh21563/ola_data_analyst_project

Student Score Prediction

- Designed an end-to-end ML pipeline to predict student performance: handled data cleaning, validation, and feature engineering before training and evaluating classification models using Python and scikit-learn.
- Achieved measurable accuracy improvements through iterative feature selection and model tuning, demonstrating a systematic, data-driven analytical approach.
- **GitHub:** github.com/ansh21563/mlproject

Video-Based RAG System

- Built a Retrieval-Augmented Generation (RAG) pipeline using video transcript embeddings and JSON vector storage to enable precise, timestamp-based query retrieval.
- Showcased ability to work with unstructured data, design analytical pipelines, and deliver AI-driven insights — skills directly applicable to real-world data analysis tasks.
- **GitHub:** github.com/ansh21563/Rag_project12
-

EDUCATION

Master of Computer Application – Executive MCA

2026 – 2027

IIT Patna & IIIT Ranchi, Patna, Bihar | Present

Bachelor of Computer Application – BCA

2022 – 2025

Jagannath University, Bahadurgarh, Haryana | Graduated 2025

SKILLS

SQL • Python • Power BI • Excel • Pandas • NumPy • Power Query • DAX • Data Cleaning • EDA • Data Visualization • scikit-learn • Git
