Delhi, India | +91 9278685392 | github.com/ansh21565 | [linkedin.com/in/ansh-aggarwal-2643492b4](https://www.linkedin.com/in/ansh-aggarwal-2643492b4)

PROFESSIONAL SUMMARY

Detail-oriented Data Analyst fresher with hands-on experience in end-to-end data pipelines, exploratory data analysis, and machine learning model development. Proficient in Python, SQL, Pandas, NumPy, and data visualization. Completed internship at Shamgar Software Solutions with real-world project exposure. Pursuing Executive MCA from IIT Patna & IIIT Ranchi. Seeking a Data Analyst role to leverage analytical skills and grow toward advanced data science.

TECHNICAL SKILLS

Data Analysis & Visualization:	Python, SQL, Pandas, NumPy, Matplotlib, Seaborn, Excel
Machine Learning:	scikit-learn, Feature Engineering, Model Evaluation, EDA
Databases & Querying:	SQL (MySQL / SQLite), JSON, CSV data handling
Deployment & Tools:	Flask, MLflow, Git, GitHub, Jupyter Notebook, VS Code
Cloud (Basic):	AWS (basic), Azure (basic), Docker (learning)
AI & Emerging Tech:	LLMs, RAG (Retrieval-Augmented Generation), In-Context Learning
Certifications:	Oracle OCI AI Foundation, Data Science Professional; NPTEL Python & ML

EXPERIENCE

Data Science Intern (Remote)

Shamgar Software Solutions, Visakhapatnam, India Oct 2025 – Present

- Performed end-to-end data analysis including data collection, cleaning, EDA, and feature engineering using Python, Pandas, NumPy, and SQL on real-world datasets.
- Built and evaluated machine learning models using scikit-learn; improved model accuracy through hyperparameter tuning and cross-validation.
- Conducted exploratory data analysis (EDA) to identify trends, outliers, and patterns, and communicated findings via structured reports and visualizations.
- Collaborated with mentors to translate business problems into data-driven solutions, supporting decision-making with actionable insights.
- Deployed an ML model as a web application using Flask; documented workflows, performance metrics, and results for stakeholder review.
- Participated in workshops on Solution Architecture, AI Tools, Industry Best Practices, and Professional Communication.

PROJECTS

Student Score Prediction | Python, scikit-learn, Pandas, EDA

- Designed an end-to-end ML pipeline covering data preprocessing, EDA, feature engineering, model training, and evaluation to predict student academic performance.
- Analyzed dataset patterns and visualized key correlations; achieved strong predictive accuracy using regression models with scikit-learn.

Video-Based RAG System (Ongoing) | Python, LLMs, Vector Embeddings, JSON

- Built a Retrieval-Augmented Generation (RAG) pipeline by generating embeddings from video transcripts and storing vectors in JSON for timestamp-based query retrieval.
- Applied NLP and LLM-based techniques to enable semantic search over unstructured video content.

EDUCATION

Master of Computer Application — Executive MCA (2026–2027)

IIT Patna & IIIT Ranchi, Patna, Bihar, India Present

Bachelor of Computer Application (BCA) — 2022–2025

CERTIFICATIONS & TRAINING

- Oracle: OCI AI Foundation Associate | Oracle Data Science Professional
- NPTEL: Python for Data Science | Machine Learning
- Harry's Ultimate Data Science Job-Ready Course (Udemy / Online)
- Shamgar Software Solutions Workshops: Solution Architecture, AI Tools, Industry Communication & Professional Etiquette
